

## ZEISS Integrated Diagnostic Imaging Symposium

Friday 31<sup>st</sup> January 2020, The MTC Coventry

**5 CPD Points Confirmed**

<b>09:30 – 10:00</b>	Registration	
<b>10:00 – 10:05</b>	Welcome & Introductions	
<b>10:05 – 11:05</b>	<p><b>Breadth and Depth</b>  <i>The aim of this session will be to explore the potential benefits that widefield true colour and OCT-A imaging could bring to patients and to clinical practice. Mr Rajendram will also look to the future and assess how these advantages could be deployed to improve on current clinic pathways. The session will feature cases using the Plex Elite 9000 Swept Source Widefield OCT and OCT-Angiography, along with CLARUS Ultra-Widefield True Colour imaging.</i></p>	<p><b>Mr Ranjan Rajendram</b>  (Moorfields Eye Hospital)</p>
<b>11:05 – 11:20</b>	Coffee Break	
<b>11:20 – 12:20</b>	<p><b>Use of Glaucoma Workplace in a modern clinical setting.</b>  <i>This session will discuss the use of ZEISS FORUM Glaucoma workplace within the clinical setting. Case scenarios will further demonstrate how the combination of CIRRUS HD-OCT data and Humphrey® Field Analyzer (HFA) information can be combined into an easy to read side-by-side dashboard. Mr Panos will share experiences of the Ophthalmic team in the hospital, who have on-demand access the combined structure-function results in the consulting room, at a workstation, or in the examination lanes. The session will demonstrate how this solution is invaluable in aiding assessments of patient change and progression.</i></p>	<p><b>Mr Chris Panos</b>  (Epsom Hospital)</p>
<b>12:20 – 13:00</b>	Lunch	
<b>13:00 – 14:00</b>	<p><b>3 Years' Experience of OCT Angiography</b>  <i>OCT has become the accepted standard of care in both hospital and optometric settings. The more recent advent of OCT Angiography (OCT-A) represents the next generation of this technology, providing a highly detailed view of the retinal vasculature. Mr Lee will use this session to share his experiences of working with both OCT and OCT-A for the past three years, utilising cases to demonstrate the clinical benefits.</i></p>	<p><b>Mr Nick Lee</b>  (Ophthalmic President, RSM / Western Eye Hospital)</p>
<b>14:00 – 15:00</b>	<p><b>Masterclass Rotations:</b></p> <ul style="list-style-type: none"> <li>• OCT</li> <li>• UWF Imaging &amp; Data Management</li> </ul>	<p><b>Naheem Abbas &amp; Lyn Millbank</b>  (ZEISS Academy Team)</p> <p><b>Darren Hargreaves &amp; Brian Stevens</b>  (ZEISS Academy Team)</p>
<b>15:00 – 16:00</b>	<p><b>The journey to connect. Practical advice on ensuring a successful deployment.</b>  <i>There are a wide range of devices and levels of connectivity from one eye unit to the next. This session offers practical advice to make the case for integrated imaging and ensure optimal network design and configuration. Tips and lessons learnt from such a deployment are provided, along with clear explanations of some the key technical terms.</i></p>	<p><b>Mr David Haider</b>  (Royal Bolton Hospital)</p>
<b>16:00</b>	Wrap Up, Feedback & Accreditation
